

MANJUNATH PRASAD H. R.

manjunathprasad.github.io • manjunathprasad99@gmail.com

SUMMARY

An academician with over **eight years of pedagogical experience** across affiliated, autonomous, and university institutions in India, complemented by **five years of industry expertise** in machine learning and full-stack .NET development in both India and the United States.

EDUCATION

Doctor of Philosophy *31 May 2027*
Visvesvaraya Technological University, Belagavi
Thesis Title: Vision – Language integration for real – world scenarios
Current Status: Completed Course Work

Master of Science in Computer and Information Sciences *31 Jan 2019*
University of Massachusetts, USA
Relevant coursework focus on Machine learning
Completed Master's Project – GAN Implementation for human face resolution

Master of Technology in Computer Network Engineering *30 May 2011*
Visvesvaraya Technological University, Belagavi
Relevant coursework focus on Computer Networks
Completed Master's Project in the area of Network Security

Bachelor of Engineering in Computer Science and Engineering *30 May 2008*
Visvesvaraya Technological University, Belagavi
Completed Bachelor's degree Project
at Global Edge Software Systems, Bangalore

TEACHING EXPERIENCE

Assistant Professor Grade - III *01 May 2024 - Present*
Nitte Institute of Professional Education, Nitte (Deemed to be University) *(Current)*
Mangaluru, Karnataka, India

Assistant Professor Grade - II *02 Jun 2014 - 10 Jan 2017*
N. M. A. M Institute of Technology, Nitte (Deemed to be University) *(2 Years 7 Months 8 Days)*
Nitte, Karnataka, India

Assistant Professor Grade - I *01 March 2012 - 31 May 2014*
Canara Engineering College *(2 Years 3 Months)*
Benjanapadavu, Karnataka, India

Lecturer *14 Feb 2011 - 29 February 2012*
Canara Engineering College *(1 Year 15 Days)*
Benjanapadavu, Karnataka, India

Lecturer *18 August 2008 - 30 June 2009*
Adichunchanagiri University *(10 Months 15 Days)*
(formerly B. G. S. Institute of Technology)
B. G. Nagara, Karnataka, India

INDUSTRY EXPERIENCE

Technology Lead

01 April 2019 - 04 April 2024

Infosys Limited

(Clients - Microsoft Corporation, Charles Schwab Corporation, Travelers Insurance)

(5 Years)

Richardson, Texas, USA / Mysuru, India

SKILLS

Machine Learning Development

Python, ML.Net, NumPy, SciPy, TensorFlow, Keras, MATLAB(Deep Learning Toolbox)

Backend Web Development

C# 12, ASP.NET 4.x, ASP.NET Core 8.0, MVC, Web API, Entity Framework, Razor Pages

Frontend Web Development

ReactJS, Typescript, JavaScript, CSS3, HTML5

Other Web Development Tools

Linq, JQuery, AJAX, Bootstrap 4

Test Automation

Selenium and Microsoft Playwright

Cloud

Microsoft Azure and Pivotal Cloud Foundry

Database Technology

Microsoft SQL Server, MongoDB and Oracle

Unit Testing

xUnit.net, NUnit, MS Test, Moq, Auto Fixture, Auto Moq and Fluent Assertions

Continuous Integration / Continuous Delivery

Microsoft Azure DevOps and Atlassian Bamboo

Version Control System

Git, Microsoft Azure DevOps and Atlassian Bit bucket

Development Methodology

Agile and Waterfall

Documentation

Atlassian Confluence, L^AT_EX and Microsoft Word

CERTIFICATION

Microsoft Certified: Azure Fundamentals

Issued By: Microsoft

Issued On: 02 May 2023

Credentials: Verified Badge

JOURNAL PUBLICATIONS

1. Holenarasipura Rajiv, M. P., & Vidyavathi, B. M. (2025). Vision–language integration for zero-shot scene understanding in real-world environments. arXiv preprint arXiv:2510.25070. Submitted to IEEE Transactions on Pattern Analysis and Machine Intelligence. (Under Review)
2. Holenarasipura Rajiv, M. P., & Vidyavathi, B. M. (2025). Dynamic context-aware scene reasoning using vision–language alignment in zero-shot real-world scenarios. arXiv preprint arXiv:2510.26580. Submitted to IEEE Transactions on Pattern Analysis and Machine Intelligence. (Under Review)

PATENT

Vision–Language–Action Framework for Diabetic Retinopathy Prognosis

Filed through Nitte (Deemed to be University)

November 2025

Inventors: Manjunath Prasad H. R., B. M. Vidyavathi

Status: *Filed*

This patent proposes an AI-driven framework integrating visual and linguistic understanding to enhance diabetic retinopathy prognosis via multimodal fusion and interpretable reasoning.

AWARDS

Star Performer in Job Level 5(Team Lead)

23 Dec 2021

Awarded by Infosys Limited with a Cash prize of \$50 and a certificate

This is awarded based on leading a team and mentoring them to good traction and ensuring that there is no slippage in deliverables for Microsoft as a client.

L^AT_EX WORKSHOPS CONDUCTED

L^AT_EX is a typesetting tool used to typeset Ph.D. Thesis, project reports, and book chapters. Conducted workshops as a resource person upon the invitation of various educational institutions and the details are below.

Date	Institution Name	Target Audience	Workshop Length
28 – 29 July 2016	Bahubali College of Engineering	Engineering Teaching Faculty	2 Days
25 – 27 July 2016	NMAM Institute of Technology, Nitte	Ph.D and Graduate Students	3 Days
23 – 25 June 2016	National Institute of Technology, Mysore	Ph.D and Graduate Students	3 Days
18 – 20 June 2016	Sri Dharmastala Manjunatheshwara Institute of Technology, Ujire	Ph.D and Graduate Students	3 Days
09 October 2015	Amrita University, Mysore	Ph.D and Graduate Students	1 Day
14 – 16 July 2015	NMAM Institute of Technology, Nitte	Ph.D and Graduate Students	3 Days
05 June 2015	National Institute of Technology, Mysore	Ph.D and Graduate Students	1 Day
09 March 2015	Alva's Institute of Technology Moodabidri	Engineering Teaching Faculty and Undergraduate Students	1 Day

PROJECTS

Travelers Project

Client: Travelers Insurance, Hartford, CT, USA

- In this project, I developed a fully automated workflow to place customers' work orders.
- Migrated several projects from ASP.NET 4.x to ASP.NET 6.0
- Implemented ML.NET models to predict the trends in customers and policies
- Responsible for the complete software development cycle including deployments and releases.

Un-identified Charges

Client: Microsoft Corporation, Redmond, Washington, USA

- Un-identified charges is a Microsoft's global payments project. In this project, unknown charges made on the credit card option were provided to a user to investigate whether the payment transactions were genuinely made by the user with his credit card.
- Developed a Chatbot using ChatGPT and Vision and also a machine learning model to identify anomaly transactions to help find the out-of-pattern transactions.
- Developed ReactJs front end with a button, side panel, and submit button.
- Developed an ASP.NET Web API to make calls to different endpoints in order to get the required credit card information.
- Implemented CRUD functionality using ASP.NET Web API.

Payee Management

Client: Microsoft Corporation, Redmond, Washington, USA

- Payee Management is Microsoft's global payments and cash project. This project is responsible for onboarding payee with all the details of the individual or organization business profile, bank account details, and tax details located globally in any geographical region to pay for the services Microsoft consumes. In this project, the following are the contributions.
- Migrated Microsoft's payee applications written in ASP.Net framework which contains common class libraries, MVC, and web API to ASP.NET core 6.0.
- Worked on developing **time triggered Azure functions** version 4.x application in order to generate and upload invoice documents from payee to Microsoft SQL databases
- Developed **ASP.NET 6.0 MVC application** to provide a portal for payee on-boarding to create a profile, bank account profile, and tax profile.
- Developed **ASP.NET Core 6.0 web API** with CRUD functionality to update payee details in SQL server database.
- Extensively used **dependency injection** in building ASP .NET Core 6.0 web applications like MVC AND Web API in building efficient .net applications.
- Implemented various **.NET Core concepts of asynchronous programming, logging, configurations, exception handling** in building payee web applications.
- Worked on **Azure service bus with a new version of Azure messaging** to read payee details and update into the SQL database.
- Worked on **azure blob storage** in order to create and update files in Azure Cloud which had a function of storing invoice documents in Azure cloud
- Implemented **.Net core authorization and authentication mechanisms** with JWT token authentication.

- Experience in deploying the .net core web apps in **azure ev2 pipelines** in both production and non-production environments
- Analyzed security compliance code QL bugs reported by Microsoft security scans and **fixed the bugs in production environment**
- Worked with various teams in order to test and develop end-to-end development scenarios.

Dynamics for Microsoft

Client: Microsoft Corporation, Redmond, Washington, USA

- Dynamics for Microsoft is a Microsoft customer relationship management(CRM) case management for Microsoft's various products like Azure, XBox, office, etc.
- Developed **C# plugins in Dynamics 365** solution to build new features for DfM case management
- Implemented User interfaces using **typescript in D365 solution** to build features for Microsoft CRM case management
- **Fixed UI bugs** involved code developed in typescript, JavaScript, and CRM solutions. Written unit and integration tests for the developed code for several bugs.
- Experienced in handling **mitigation and resolution of ICMs in live site**
- Handled **scripts and fixes in Azure DevOps** which consisted of Power Shell script and Azure deployments
- Implemented automated tests for cases and their activities, entitlements, knowledge articles, queues, and business process flows in the D365 solution
- Written automation tests using custom proprietary selenium-based automation framework on a daily basis for the DfM User interfaces developed using Dynamics 365 and Typescript
- Written unit and integration tests for the developed code for several bugs.
- Implemented automation integration test cases for the developed features in DfM
- Handled manual testing after production deployments
- Maintained pre-production deployments in Azure Devops
- Worked with PM and DEV teams to understand the requirements in order to develop the required automation for the features

Real time Order processing and Advisory Services

Client: Charles Schwab, Austin, Texas, USA

- Worked in Trading technology extensively to provide back-end services using **C#. NET, ASP.NET Core, ASP.NET MVC, Web API, and MongoDB**
- Worked in Agile Scrum methodology and delivered accepted functionality in each sprint.
- Built Web-based application using Microsoft .NET technologies like C#, ASP.Net, MVC, ASP.NET CORE and Web API.
- Implemented **CRUD functionality with MongoDB C# Driver** to persist the Schwab trading orders and implemented sorting and filtering in MongoDB.
- Developed a back-end web application using C#.Net Core, ASP.NET Core, ASP. NET MVC, WEB API, which receives the orders placed from Advisors' services, drains the same and persists in MongoDB.
- Developed an application to provide inquiry services for persisted orders in MongoDB for Advisors' services. Contributed to auxiliary application in scrubbing DB2 orders and loading into MongoDB.
- Expertise in performance testing and tuning of web applications developed to handle the perfect number of orders in a stipulated time to achieve the required load.

- Expertise in deployment, maintenance, and issue/bug fix of web application in **PCF, VM boxes and IaaS servers**.
- Extensively used tools like all variants of Visual Studio versions, Atlassian toolset like **JIRA, Bitbucket and Confluence**
- Have versatile communication and experience in leading offshore teams along with on-shore responsibilities.
